

Job Title: Technical Project Manager

Location: Indore

Experience: 8+ years

Notice Period: 0-15 days (immediate joiners preferred)

Job Type: Full-time

Job Summary:

Advantal Technologies is looking for a highly skilled Technical Project Manager with a strong background in Mobile Application Development, Custom Software Development, Java, and both Frontend and Backend development. The ideal candidate will have proven experience in technical project management, leading cross-functional teams, and successfully delivering complex projects on time and within budget. The candidate should possess excellent leadership, communication, and problem-solving skills while ensuring seamless collaboration between developers, designers, QA, and business stakeholders.

Key Responsibilities:

- Define project scope, goals, and deliverables that align with business objectives.
- Develop and maintain detailed project plans, timelines, and resource allocations.
- Ensure smooth execution of mobile app development, Java-based backend systems, frontend web applications, and custom software projects from initiation to deployment.
- Track project milestones and deliverables while proactively managing risks and dependencies.
- Collaborate with developers, designers, QA teams, and business stakeholders to ensure technical feasibility and alignment with requirements.
- Guide teams in implementing best practices in Agile/Scrum, DevOps, and CI/CD pipelines for efficient development and deployment.
- Oversee Java development for backend systems, ensuring high-quality code, performance, and scalability.
- Work with frontend technologies (HTML, CSS, JavaScript, React, Angular, etc.) to ensure responsive, user-friendly designs.
- Ensure high-quality standards in software architecture, UI/UX, performance, and security.
- Act as a bridge between technical teams and non-technical stakeholders, simplifying complex concepts for clear understanding.
- Serve as the primary point of contact for all project-related discussions, ensuring clear communication with clients and internal teams.
- Address project challenges, propose solutions, and make informed decisions in collaboration with the team.
- Identify resource needs and coordinate effectively with HR and leadership for team scaling.
- Anticipate potential project risks, devise mitigation strategies, and implement corrective actions.
- Ensure compliance with project timelines, budget constraints, and overall quality standards.

Required Skills & Qualifications:

- Proven experience of 8+ years as a Technical Project Manager handling Mobile Application Development, Java-based backend development, and Custom Software Development projects.

- Strong technical background in mobile app development (iOS/Android), frontend development (HTML, CSS, JavaScript, React, Angular), backend systems (Java, Spring Boot, REST APIs), and cloud platforms.
- Hands-on experience with Agile methodologies such as Scrum/Kanban and tools like JIRA, Trello, or Asana.
- Familiarity with DevOps practices, CI/CD pipelines, and cloud platforms (AWS, Azure, or GCP) is a plus.
- Excellent understanding of software development life cycle (SDLC) and best practices in development and deployment.
- Strong leadership, problem-solving, and stakeholder management skills.
- Excellent verbal and written communication skills.
- PMP, CSM, or equivalent certifications (preferred but not mandatory).

Why Join Us?

- Work on cutting-edge mobile app, custom software, frontend, and backend development projects.
- Be part of a dynamic and innovative team.
- Competitive salary and growth opportunities.

If you have the passion for technology and the leadership skills to drive complex projects, we would love to hear from you!
