

Job Title: Angular Developer

Experience: 2-3 Years

Location: Gurugram

Joining: Immediate Joiners Preferred

Work Mode: Work from Office

Advantal Technologies is looking for a skilled **Angular Developer** to join our team. The ideal candidate will be responsible for developing high-quality web applications using Angular best practices. The candidate will collaborate closely with backend developers, UI/UX designers, and other stakeholders to build scalable, efficient, and user-friendly applications.

Key Responsibilities:

- Design, develop, and maintain user interfaces using Angular best practices.
- Build reusable modules, components, and services for scalable applications.
- Integrate front-end applications with APIs using standard communication methods.
- Adapt interfaces for modern web applications using the latest front-end technologies.
- Make sound technical and architectural decisions for Angular projects.
- Conduct performance testing and optimize applications for speed and scalability.
- Work closely with the design team to ensure seamless user experience.
- Provide ongoing support, troubleshooting, and enhancements for applications.

Required Skills:

Angular

- Strong understanding of Angular architecture and core concepts such as:
 - Components
 - Services
 - Pipes
 - Directives
 - Modules
 - Lifecycle Hooks
- Hands-on experience with advanced Angular concepts such as:
 - Dynamic Components
 - Content Projection
 - Reactive Forms
 - ViewChild / ContentChild
 - Observables and RxJS Operators
- Ability to design component and module hierarchy for moderately complex applications.

CSS / Bootstrap

- Strong knowledge of CSS, Bootstrap, and responsive design.
- Good understanding of Flex Layout, positioning, and cascading behaviour of CSS.

JavaScript

- Strong understanding of JavaScript fundamentals including:
 - Prototype Chain
 - Inheritance
 - DOM Manipulation
 - Events, Bubbling & Capturing
 - Promises and asynchronous programming

TypeScript

- Good working knowledge of TypeScript including:
 - Union Types
 - Index Signatures
 - Interfaces and basic typing concepts

Qualifications:

- Bachelor's Degree in Computer Science, Computer Engineering, or related field.
- Proven experience as an Angular Developer.
- Strong problem-solving and analytical skills.
- Excellent communication and project management abilities.
- Experience in developing JavaScript-based front-end and back-end applications is a plus.
